# CALL FOR PAPERS

## **The Future of Medical Education: Emerging Trends and Technologies**

## ***Medical Education Today Book Series***

Edited by Éva D. Molnár,  
University of Szeged

The field of medical education is constantly evolving, with emerging trends and technologies transforming the way we educate and train future healthcare professionals. The volume "The Future of Medical Education: Emerging Trends and Technologies" seeks to explore these developments and their implications.

We invite scholars, educators, and practitioners to submit proposals for chapters that critically examine emerging trends and technologies in medical education. The collection aims to showcase cutting-edge research, innovative approaches, and best practices that can inform the future of medical education. Submissions can address a range of topics, including but not limited to:

- The use of virtual and augmented reality in medical education
- Artificial intelligence and machine learning in medical education
- Interprofessional education and collaboration
- Competency-based education and assessment
- Team-based learning and collaborative care models
- Global health and medical education
- Medical education in the context of pandemics and public health crises
- Social media and online learning communities in medical education

We welcome both empirical and theoretical contributions, as well as case studies and practical examples of innovative teaching practices. Chapters should be grounded in relevant scholarship and offer insights that can be applied to medical education practice.

# Submission and publication information

Please submit an abstract and your short bio to  
Dr. Éva D. Molnár by **31 July 2023**.

Please email Dr. Molnár at [molnar.eva@med.u-szeged.hu](mailto:molnar.eva@med.u-szeged.hu)  
and please CC [artimon.teodora@uvvg.ro](mailto:artimon.teodora@uvvg.ro).

The authors of the accepted abstracts will be asked to  
submit their full papers in the  
**autumn of 2023 (exact date to be announced)**.

This volume will be published in the  
"Medical Education Today" book series (ed. Éva D. Molnár)  
within the imprint **Ethics, Bioethics and Medical Sciences**,  
headed by Prof. Coralia Cotoraci, "Vasile Goldiș" Western University of Arad.
